PROFESSIONAL SUMMARY

Principal Software Engineer with 7+ years of experience delivering high-performance, production-grade Flutter and native mobile applications for enterprise and consumer clients across the UAE, Japan, Norway, the Netherlands and the US. Runs engineering on an AI-Driven Development Life Cycle (AIDLC) with agentic workflows. Proven record of leading cross-functional teams, owning architectural decisions on CLEAN Architecture codebases, and shipping applications to large user bases. Drives engineering quality through technical hiring, mentoring and best-practice standards. Open-source author on pub.dev and MonstarHacks 2024 winner.

SKILLS

- **Programming Languages:** Dart, Kotlin, Java, C, C++, JavaScript
- **Mobile Development:** Flutter, Dart, Material and Cupertino widgets, responsive UI, Flutter life-cycle, memory management, isolates, Native Android, Jetpack Compose, Hilt, Kotlin Multiplatform (KMP)
- **Architecture and State Management:** CLEAN Architecture, BLoC, Cubit, Riverpod, Provider, Dependency Injection (GetIt, Injectable), Freezed, JSON Serializable
- **Testing and Quality:** Unit testing, Widget testing, Mocktail, Bloc Test, Test-Driven Development (TDD)
- **CI/CD and DevOps:** Bitrise, GitHub Actions, Fastlane, Git
- **Backend and Cloud:** Firebase (Firestore, Crashlytics, Hosting), REST APIs
- **Web:** ReactJS, Flutter Web
- **AI-Driven Engineering:** AI-Driven Development Life Cycle (AIDLC), AI-assisted development workflows
- **Leadership:** Team leadership, hiring and technical interviewing, mentoring, code review, stakeholder communication

PROFESSIONAL EXPERIENCE

Principal Software Engineer

Brain Station 23 PLC | Dhaka, Bangladesh | October 2026 - Present

- Run mobile engineering on an AI-Driven Development Life Cycle (AIDLC): agentic workflows built on Claude Code custom commands handle feature planning, implementation and issue investigation.
- Lead a team of 7 mobile engineers in the Europe Strategic Business Unit (SBU) for clients in Norway and Japan; serve on the recruitment board and support pre-sales with solution design and proposals.

Lead Software Engineer

Brain Station 23 PLC | Dhaka, Bangladesh | December 2024 - September 2026

- Lead a team of 7 engineers within the Europe Strategic Business Unit (SBU), delivering European client projects (Norway) alongside large-scale applications for the Japanese market.
- Own end-to-end development and performance optimisation of production mobile applications, from architecture decisions through to release quality.
- Define and enforce engineering best practices (architecture guidelines, code-review standards) that improve delivery speed and product quality across the team.

Senior Mobile Engineer - I

Monstarlab Bangladesh Ltd. | Dhaka, Bangladesh | August 2023 - November 2024

- Led complex Flutter delivery for a leading UAE banking group (Bank FAB), collaborating on-site at the client's Dubai office to align engineering with business stakeholders.
- Established maintainable architecture standards and mentored new engineers through technical interviews and code-review feedback.
- Translated technical concepts for non-technical stakeholders, ensuring smooth, on-time project execution across distributed teams.

Mobile Engineer - II
Monstarlab Bangladesh Ltd. | Dhaka, Bangladesh | August 2021 - July 2023

- Authored clean, well-documented and maintainable Flutter code, raising long-term project efficiency and reducing technical debt.
- Collaborated with designers, product managers and QA engineers to deliver consumer apps (media streaming, social, job search) to production for international clients.

Software Engineer
HeavyTask LLC | Dhaka, Bangladesh | December 2018 - July 2021

- Built cross-platform mobile apps in Flutter and high-quality web dashboards in ReactJS, focused on functionality and user experience.
- Owned communication with international (US-based) clients, gathered requirements, mentored new joiners and supported the hiring process.

KEY PROJECTS

- **WellWa** (Flutter, Brain Station 23): Led development and performance optimisation of a large-scale e-commerce mobile application for the Japanese market.
- **Ditio** (Kotlin Multiplatform, Brain Station 23): Contributed to a cross-platform app for Ditio, a Norway-based construction-technology platform, sharing business logic across iOS and Android.
- **TryggBat** (Flutter, Brain Station 23): Developed a consumer mobile application for a Norway-based client.
- **Peppes Pizza** (Flutter, Brain Station 23): Built the mobile ordering app for Peppes Pizza, a leading Norwegian pizza chain.
- **Bank FAB Business** (Flutter, Monstarlab): Led the onboarding stream from scratch for an enterprise banking app for a UAE-based banking group, working on-site at the client's Dubai office.
- **Blinx** (Flutter, Monstarlab): Team lead and top contributor; media-streaming app built from scratch for the UAE market and released to a large user base.
- **Gems** (Flutter, Monstarlab): Top contributor to a location-based social-networking app for a Netherlands-based client; delivered to production.
- **Discount Dumpsters** (Flutter and React, HeavyTask): Digitised the paperwork of a US-based (Dallas) dumpster company, significantly reducing manual operations.

OPEN SOURCE AND PUBLICATIONS

- **u_credit_card** (pub.dev): Customisable, realistic credit-card UI widget for Flutter with engaging animations.
- **trace_logger** (pub.dev): Lightweight Flutter logger with automatic class-name capture and colour-coded, emoji-labelled output.

EDUCATION

Bachelor of Science in Computer Science and Engineering
Rajshahi University of Engineering and Technology (RUET) | 2014 - 2018 | First Class | Rajshahi, Bangladesh

AWARDS AND ACHIEVEMENTS

- Winner, 4th MonstarHacks 2024 (Team SportsBuddy).
- Create Value Award 2023, Monstarlab Bangladesh.
- 2nd Runner-Up, 2nd MonstarHacks 2022 (Team Invictus).
- Speaker, Flutter Guild Day 2026: "Building with Agentic AI — The Modern Development Skill Set".
- ACMP 4.0, Advanced Certificate for Management Professionals, IBA, University of Dhaka, 2025.
